Skills

Programming Languages — TypeScript, JavaScript, Python, C#, PHP, SQL

Frameworks & Libraries — React, Next.js, Node.js, ASP.NET Core, Angular, Svelte, Redux

Databases — MongoDB, PostgreSQL, DynamoDB

Cloud & DevOps — AWS (EC2, S3, Lambda, EKS, CDK, IAM, VPC), Docker, GitHub Actions, CI/CD, Serverless

Tools & Integrations — Git, Postman, Jira, Microsoft Entra, QuickBooks API, Stripe, PayPal, Google Maps API, OpenAI

Frontend & Styling — HTML, CSS, SASS, Tailwind CSS, Bootstrap

Work Experience

Software Engineer – SSP Group of Companies

Jan 2025 – Present | Milton, ON

- Built DriveDock, replacing paper-based driver hiring across HR, safety, compliance, and operations.
- Engineered a **10+ stage** conditional workflow with validation, step gating, secure resumption, and **three-language support**, improving data accuracy by **95%**.
- Built NPT Onboard, a multi-tenant employee-lifecycle platform for **Canada, the United States, and India**.
- Automated recognition-based attendance tracking, saving **100+ staff hours monthly**.
- Developed APIs, AWS document workflows, PDF generation, notifications, and lifecycle automation for hiring, inventory, and employee management.
- Increased reporting efficiency by **40%** through centralized data pipelines and automated reports.
- Owned delivery from stakeholder requirements and system design through deployment and production support.

Full-stack Web Developer – B. Nestor Logistics Inc.

Jan 2024 – Jan 2025 | Waterloo, ON

- Built and maintained a logistics-automation platform, reducing manual workflows by **70%**.
- Integrated QuickBooks invoicing and financial workflows, saving finance teams **10+ hours weekly**.
- Built PDF and spreadsheet reports for compliance and operations, cutting turnaround time by **50%**.
- Implemented role-based access across multiple user tiers and operational functions.
- Managed AWS EC2/S3 infrastructure and CI/CD pipelines, reducing deployment time by **30%**.
- Partnered with operations teams to refine requirements and ship features used daily.

Freelance – Full-stack Web Developer

Mar 2019 – Jan 2024 | Remote

- Delivered **15+ full-stack applications** for startups and small businesses.
- Built REST APIs with JWT/OAuth authentication, authorization, validation, and third-party integrations.
- Independently researched, designed, and delivered Neon Shop, a configurable-product eCommerce platform for a client.
- Built responsive commerce, content, and business interfaces with React, Next.js, Angular, and Svelte.
- Integrated **10+ services** across payments, maps, identity, storage, media, email, and data.
- Built serverless services and CI/CD pipelines with AWS, GCP, GitHub Actions, and Jenkins, reducing release

errors by **40%**.

- Deployed and maintained applications on Vercel and Netlify, including debugging, performance tuning, and production support.

Project Work

DriveDock — Driver Onboarding & Workflow Automation System (Production)

- Built a multilingual platform digitizing driver hiring across applicants, HR, safety, compliance, and operations.
- Created a conditional engine with validation, server-side step gating, secure resumption, progress tracking, and **10+ lifecycle stages**.
- Delivered localized forms and rules in **English, French, and Spanish** across companies and jurisdictions.
- Orchestrated prequalification, applications, consents, drive tests, training, drug tests, reviews, and completion.
- Built role-based dashboards with audits, notes, document review, status controls, termination, and restoration.
- Created S3/Lambda document pipelines and automated compliance PDFs with Puppeteer and PDFMake.
- Enabled **100% paperless onboarding** with greater data accuracy and cross-department visibility.

Tech: Next.js, TypeScript, MongoDB, AWS S3/Lambda, Microsoft Entra ID, Puppeteer/PDFMake, Tailwind CSS

NPT Onboard — Multi-tenant Employee Onboarding Platform (Production)

- Built a multi-tenant employee-onboarding platform for **Canada, the United States, and India**.
- Implemented secure invitations with protected tokens, OTP verification, session controls, throttling, and failed-attempt limits.
- Built digital and manual onboarding with regional forms, validation, document collection, declarations, and signatures.
- Created HR dashboards for review, change requests, approvals, contracts, termination, restoration, and reporting.
- Implemented secure S3 document handling and Lambda-based PDF and spreadsheet generation.
- Integrated Microsoft Graph email for invitations, OTPs, approvals, change requests, terminations, and document delivery.
- Added audit logs and lifecycle history, improving compliance visibility and reducing HR coordination.

Tech: Next.js, TypeScript, MongoDB, AWS S3/Lambda, Microsoft Entra ID/Graph, React Hook Form/Zod

GeoEvent — Event Discovery & Management Platform (Winning Capstone)

- Built and launched a platform for discovering, creating, registering for, and managing local events.
- Unified user-created events and Ticketmaster listings in one discovery experience.
- Integrated Google Maps with markers, clustering, location search, and date, category, format, and language filters.
- Built organizer workflows for event management, S3 media, follower notifications, and registration tracking.
- Added OpenAI-assisted descriptions and URL-based event imports using structured content extraction.
- Created organizer analytics for views, registrations, ratings, trends, followers, and top events, plus role-based administration.
- Launched to real users and was selected as Conestoga College's **winning Computer Programming capstone**.

Tech: Next.js, TypeScript, MongoDB, Google Maps/Ticketmaster APIs, OpenAI API, AWS S3

Neon Shop — Configurable-Product eCommerce Platform

- Solo-built a complete configurable-product eCommerce platform for a freelance client.
- Created a live neon builder with **21 fonts, 12 colors, and 8 icons**, responsive previews, and automatic text

scaling.

- Added size calculation, dynamic pricing, acrylic backing, mounting options, notes, and approval consent.
- Preserved each design as structured data across cart, checkout, payment, tracking, administration, and fulfilment.
- Built guest/customer checkout, catalog filters, accounts, order history, and public order tracking.
- Integrated Stripe, Afterpay/Clearpay, and PayPal with verified webhooks, payment states, and transactional emails.
- Built protected admin tools for products, categories, Cloudinary media, orders, design previews, fulfilment, and bulk actions.

Tech: Next.js, JavaScript, MongoDB, Stripe/Afterpay, PayPal, Cloudinary, Tailwind CSS

Education

Conestoga College — *Diploma in Computer Programming*

Waterloo, ON | 2025

GPA: 3.91 / 4.0 — *High Distinction*
