Skills

Languages: C#, JavaScript, TypeScript, Python, SQL

Frameworks: React, Next.js, Node.js, ASP.NET Core

Databases: PostgreSQL, MongoDB

Cloud/Tools: AWS, Docker, CI/CD, Git

Work Experience

Software Engineer – SSP Group of Companies

Jan 2025 – Present | Milton, ON

- Built DriveDock, a production onboarding system replacing manual workflows across departments
- Designed multi-step workflow engine with validation and session persistence, improving data accuracy by 95%
- Automated attendance tracking, saving 100+ staff hours monthly
- Built cross-platform systems integrating web, mobile, and hardware workflows across operations
- Improved reporting efficiency by 40% through centralized data pipelines

Full-stack Web Developer – B. Nestor Logistics Inc.

Jan 2024 – Jan 2025 | Waterloo, ON

- Built logistics automation platform reducing manual workflows by 70%
 - Automated invoicing via QuickBooks API, saving 10+ hours/week
 - Built automated reporting and document generation systems for compliance workflows
 - Managed AWS infrastructure and CI/CD pipelines, reducing deployment time by 30%
-

Project Work

DriveDock — Driver Onboarding & Workflow Automation System (Production)

- Designed and built DriveDock, a production onboarding system replacing manual workflows across departments
- Developed backend APIs and workflow orchestration for HR, safety, and compliance processes
- Automated document generation with AWS Lambda for async processing, enabling paperless onboarding
- Reduced hiring processing time and eliminated manual paperwork across operations
- Built role-based dashboards for admins and reviewers with real-time workflow tracking

Tech: Next.js, Node.js, MongoDB, AWS (S3)

GeoEvent — Event Discovery & Management Platform (Capstone Project)

- Built backend APIs using C# / ASP.NET Core and PostgreSQL
- Designed relational schemas for events, users, and registrations, improving performance and consistency
- Integrated OpenAI API to generate structured event descriptions from user input
- Implemented map-based routing with Google Maps API for in-app event navigation
- Built analytics dashboards for tracking event engagement and user activity
- Handled concurrent users and optimized queries for scalable event data access

Tech: ASP.NET Core, React, PostgreSQL, OpenAI API, Google Maps API

Education

Conestoga College — Diploma in Computer Programming, Waterloo, ON | 2025

GPA: 3.91 / 4.0 — High Distinction
